With over 30 years' experience working within the industry, I pride myself on producing dynamic creative visuals that will enhance any production. My award-winning documentary work has taken me around the globe. I'm often filming in challenging environments accumulating in me filming hours of primetime content for the major networks. I have expert knowledge of current high-end camera systems including the Sony Venice, FX9 and the Arri Alexa. In addition, I hold a UK GVC drone qualification with a CAA approval. I'm also certified to fly the drone in the USA and EU with a FAA Part 107 and EU EASA licence.

My clients include major broadcasters, independent production companies and streaming services.
